

# FALLSTOP® ADVENTURE REDROCK AUTO BELAY

**REDROCK AUTO BELAY** — The automatic securing device with an innovative braking system

# FALLSTOP® ADVENTURE

## REDROCK AUTO BELAY

The innovative braking system specially designed for climbing halls and the rope park sector!

The REDROCK AUTO BELAY has won prizes, such as the IAAPA Award for Product Innovations and the award for the most innovative product at the OUTDOOR Messe in Friedrichshafen, for its magnet-based braking system.

This clever technology is far superior to all other products on the market!

The decent belt is available in the lengths: 12 m / 7,5 m.

### Features of the REDROCK AUTOBELAY – ideal for climbing halls!

1. Extremely gentle, constant and, in particular, weight-independent lowering speed.
2. No wear parts in the braking system thanks to a non-contact magnetic brake.
3. No brake shoes required, which eliminates one of the main causes of failure in previous self-securing devices.
4. Low maintenance and service costs.

More than 60 % of climbing hall operators who have purchased auto-belay securing devices have experienced a significant increase in the number of customers.

### Benefits and application options in climbing halls

- **Beginners**  
Self-securing devices are an ideal way of enabling beginners to get a feel for climbing. It does away with the necessity for time-consuming, and possibly frightening, safety training, allowing them to experience climbing immediately without fear. Once a beginner has become familiar with climbing, he / she will be more open to training on how to secure a partner. Auto Belays are a useful way of motivating beginners!
- **Single climbers**  
No climbing partner? Conflicting appointments? Lunch breaks that are too short or at different times? REDROCK AUTO BELAYS mean that

you can still climb! A source of new customers in your hall! Using self-securing devices can be a welcome alternative for climbers; your customers remain loyal to you and you can boost the level of efficiency in your hall.

- **Kids' programs**

Securing devices are also ideal for children's birthdays and other kids' programs. Your staff can concentrate on looking after the young guests and are not distracted by securing tasks. Ultimately, this means you require less staff for the same number of guests.

- **Training**

Auto Belays can be an excellent training instrument, allowing unrestricted training at any time and at any level of intensity!

### Technical information

- Max. descent speed: 1.8 m / s
- Max. decent height: 12.5 m
- Rated usage weight: 10 – 150 kg
- Casing: Cast aluminium with an acetal slit for the belt
- Belt material: Nylon / Spectra  
Webbing: Width 20.32 mm, Thickness 2.5 mm, Breaking load 15.6 kN
- Dimensions: 380 x 320 x 216 mm
- Device weight: 19.3 kg
